

Predicted Risk Report Layout

Following is the record layout for the SSI Expansion - Predicted Risk Report.

- Report will be run on a monthly basis delivered on the Wednesday after the first Monday each month.
- Report will not be produced unless source table DSS.PRR_ENROLL_PROD has been refreshed.
- Report will be distributed to the applicable CMO Encounter Server sites as a variable-length CSV file, with comma-separated fields, text enclosed in pipe characters "|", and field names in the first row.
- The report will be generated from a SQL script that will produce a separate report for each managed care organization applicable to their members only.
